**£449.00**

**Price on request**

Fully automatic core aligning fusion splicer. Supplied with precision cleave tool

Finance Packages

To extend your budget when buying expensive test equipment, Auriga can offer many alternative financing packages. This gives you total flexibility to choose the financing option that works best for you. Whether you want to simply spread the cost over a few months or several years via hire purchase, or minimise the risks of a depreciating asset, maintenance, repair and disposal by using off balance sheet leasing solutions. Auriga is confident it can find a financing alternative that suits you. Our customers benefit from:

- Pre-agreed facilities, providing ultimate flexibility and speed of response
- Commitments to underwrite the future residual value of the item, offering a managed disposal and eliminating the risk of being locked into a particular product if your technology requirements change
- Our team of experts are just a call away and happy to discuss your specific requirements with you

2nd User Equipment

Ongoing updating of our hire stock means that we occasionally have second user equipment available.

We fully refurbish these units and advertise them for sale when they become available.

Call out Test & Termination Sales team on 0870 121 9731 or email [tandt@aurigaeurope.com](mailto:tandt@aurigaeurope.com), to register your interest, and we'll let you know when this equipment is available.

It's as easy as 1,2,3: -

1. Book your unit and request Customer Hire T&Cs and Equipment Hire Form
2. Read, sign and fax back
3. You are ready to go!

Minimum of 2 days hire
